

# Zomeworks Universal Track Rack Prices and Specifications

## **How to determine which Track Rack to order:**

Scroll down the column on the left to find the photovoltaic make and model you will use.

Follow the row to the right until you find the box with the number of modules you plan to place on you tracker.

Follow the column up to find the price and "Model Number" (UTR xxx) of the tracker you need.

## **Example:**

To order a rack for 16 Kyocera KC-60's the model number is " UTR F 120" and will require an extra rail set. Add \$200 to retail price.

## **Notes:**

\* Indicates that an extra rail set is required - \$200 retail

\*\* indicates that two extra rail sets are required - \$400 retail

\*\*\* Indicates that three extra rail sets are required - \$600 retail

(H) Indicates that Horizontal Channel Kit is required - \$500 retail

## **Balance is important to the operation of the tracker:**

An even number of photovoltaic modules must be mounted symmetrically on the rack.

## **Shipping:**

The UTR 020 can be shipped via UPS. All other Track Racks must be shipped by a common carrier.

## **Recommendations for Installation:**

It is the installer's responsibility to consider the soil conditions and location, when setting the pipe.

A general rule of thumb for pole installation is 2/3 pole length above ground 1/3 pole length in the ground in a hole at least three times the diameter of the pole and filled with concrete.
